

Get us out

People really think this is really what i want to do.

I'm just a kid i don't want to do this i need to.

I don't find pleasure in doing this i need to my family needs it and if i don't my family is in real danger.

I don't get payed much but what I do works to feed my family.

And our housing isn't the best, we live in tenements bunched up and cramped with feces everywhere rats and roaches. We can't help it we can't get out with how much my parents and i are getting payed it doesn't work.

Were poor we live in poverty as u can already see this is terrible. This is how I live now i'm use to it I've been doing it for a while now and i'm good at it providing for my family better than anyone else. Even though i work in poor conditions and terrible hours I'll do it for my family. But this might change soon because there has been a recent uprise in people that care about this type of stuff that want to get us out to help us live a better life.

People like Upton Sinclair.

Then he followed me to work and took some more pictures.

I guess she wanted to show the indecencies I have to go through I don't know he really didn't explain to me but what he did explain is that it's going to get me out of here that's all I care about.
